Subject: Re: BMV PHOTO

Please ask to have an Agent briefly interview him and forward results to our case file, SE 164A-81, with an EC and 302. I have attached information for the assigned SA.

We still get quite a few of these, but you never know. Key is description and his verified location in Nov 1971.

Thanks, [REDACTED] for pursuing this.

The attached information was taken primarily from manually recorded notes during communications connected with the high-jacking of Northwest Airlines Flight 305, November 24/25, 1971.

The primary method of communication with the flight was direct between NSPO (Flight Operations) and SENCO (Flight Dispatch), the flight, ME, and SFO ARINC, KNO Tower.

Due to the inability to copy everything exactly--and as rapidly--as it occurred, there may be some errors in the following. It is not believed that they are likely to be large or significant.

The following also includes additional information that developed during the incident that appeared relevant.

11/25/71

be following information from various sources, primarily the radio and phone-patch communications between the MSP Flight Operations Office "Eagle" and the flight crew.

time (CST)*

1658 Flight OFF PDX. Hijacker (HJ) apparently made his demands known shortly after this time.

Preliminary information received from MSP Planning Office (MSPPO):

HJ demanding \$200,000 (denomination not restricted), 2 chest-back parachutes, 2 back-pack parachutes. All to be available and ready at airplane parking site before landing will be permitted at SEA.

Apparently has a bomb in briefcase. Passenger apparently boarded at PDX.

1720* Crew advised they would hold over Lofall intersection until all material available. No info yet on destination HJ desired after SEA T.O. HJ had said there was to be no "funny stuff" at any time or he would detonate the bomb. Specified that only the fuel truck, air-stair truck, and automobile with the money and 'chutes approach the airplane. That airplane be parked in an "isolated" position. Gave a deadline of 1900 CST for all demands to be met. HJ remained in tourist cabin with one stewardess sitting next to him and aware of what appeared to be a bomb (dynamite sticks, wire, battery). Passengers not advised that high-jacking in progress, but that reason for the holding was "minor mechanical problem".

Crew described passenger as white, 6' 1", black hair, 175#, approximately 50, black suit, black rain coat, black brief case. (All information between cockpit and HJ being relayed by "captive" stewardess [redacted] by cabin/cockpit interphone.) b6 b7C

HJ specified that no vehicles with beacons or flashing red lights or any other were to approach airplane. MSPPO agreed that captain was in full command and all his requests and wishes would be honored. Crew taking pains likewise to gain HJ's confidence by giving him full information and cooperation.

HJ also specified that, after SEA landing and parking:

- Fueling to start as soon as engines shut down. DB Cooper-40069
- Stewardess [redacted] would leave airplane (and only her) and pick up money, then return for 'chutes. He must see knapsack with money before any other steps taken.
- Passengers will be allowed off after money and 'chutes etc in his possession and fueling under way. - 3 -

- 930^a : Airplane landed at SEA after crew and HJ assured that money and parachutes were available and in position.
- Crew requested car park at 10 to 11 o'clock position to airplane so they could see it properly.
- Notes indicate HJ indicated at one time that airplane was open to "any number of vehicles as long as no 'funny stuff' pulled."
- Direct communications between crew and NSPFO maintained at all times. Coordination between Tower, vehicles, and airplane on ground at SEA were on Ground Control frequency 121.7.
- First fuel truck apparently ran out of fuel. Crew requested second truck, with third one to be standing by. Considerable delay in getting full load of fuel and HJ was getting "nervous", saying that you must "get the show on the road".
- HJ specified that he wanted to go to Mexico City non-stop, that the aircraft configuration must be gear DOWN, flaps at 15°, that the aft entry door must be open at all times, and that the aft stairs be extended after take-off. Later specified that stairs must be fully extended before take-off. NSPFO advised crew (1) that non-stop SLA-MEX impossible with gear DOWN, flaps 15°, (2) that take-off with air-stairs full down impossible due to inability to rotate airplane. Then HJ advised of this he asked that air-stairs be partially extended prior to take-off. NSPFO advised this also impossible since stairs could not be held in any intermediate position.
- HJ had previously stated that no landing within continental U.S. would be permitted "for fuel or anything else". Then advised of range limitation in his specified configuration, he agreed to something short of the border. Asked about this, advised by NSPFO that this might be within range but that RIO would be better as far as range was concerned. Agreed to this without much, if any, objection.
- 136 : Airplane OFF at SEA.
- 140 : 14 DME S SEA VOR at 7000'. Gear DOWN, flaps extending to 30°.
- 141^a : Stewardess [redacted] allowed to go to cockpit.
- 142^a : HJ advised (by inter-phone) that he was having difficulty getting steps down.
- 143 : Aft air-stair warning light ON (stairs apparently now partially extended.) Crew had been furnished Boeing procedure for extending stairs in flight. Airplane now 19 DME S SEA VOR on V23, with gear DOWN, flaps at 30°, and at APPROACH speed.

1758 Chief Performance Engineer had been called to field to help calculate range, etc. Boeing Company had been contacted for assistance in range problem, flight characteristics with air-stairs extended, whether opening (stairs extend about 20° in flight, possibly more with man's weight on them) would be large enough for a man to exit. Boeing assured us there would be no controllability problem, that they would get experts working on range problem also, that they had dropped 2-300# boxes out air-stair opening in flight and that man could probably get out.

1800 Communications people also had arrived at field to assist if required 'phone-patching, other communications problems.

Mr. Nyrop, [redacted] four supervisory pilots, 1 performance engineer, many others on the scene (NSFPO) for assistance.

b6
b7c

185* Flight at 7000', 160KIAS, Fuel flow (PF) 4500#/engine, flaps 30° gear DOWN. NSFPO advised they would have even more severely limited range in the flaps 30° position. Crew given preliminary information on optimum range IAS (170K), weather, airports available between SE- and WNO, minimum obstruction clearance altitudes, etc.

195 NSFPO asked for stewardess best recollection of exact content of I.J. briefcase. She got on radio and gave following basic information:

- Eight red sticks, about 5" x 1" in left corner of brief case, "look like big firecrackers." Two rows of sticks, four on top of four.
- Wire attached to dynamite with red insulation.
- Battery "like flashlight battery, but about 6" high and as big around as my arm".
- Red sticks are about the color "of my uniform".

205* Crew called I.J. and asked him if everything was O.K. and he replied that it was. This was apparently the last communication the crew had with the I.J.

210* Crew reported oscillation of cabin rate of climb indicator. This probably due to I.J. weight now on stairs, stairs extending further, resultant effect on cabin pressure. May be best estimate of when he exited airplane.

NSFPO advised crew that range to WNO now looked good (airplane now at 10,000', 170K, gear DOWN, flaps 15°, RF 4000#/hour/engine, TAT -7°C. NSFPO calculated TAS and range from glide data).

DB Cooper-40071

Cabin lights ON in forward cabin, OFF in aft cabin. Curtain between first class and tourist section was closed; crew could not see whether HJ was still aboard.

22* Lost communications on IVA communications frequency (131.9); "phone-patch" with SIA ARINC established. Flight now 23 DMZ S PDX at 10,000', 40,000ft fuel aboard, 165KIAS, FF and configuration remained the same. Crew had previously been advised to switch to ARINC on 131.8 when IV'A communications lost. NSVFO and NSPPD communicated with Flight and SEA ARINC thereafter on this "phone-patch arrangement. SEADD had been monitoring all communications with flight and assisting in all other matters.

[redacted] had also been very actively participating throughout the high-jacking. He had taken money and "cllates" to airplne at SIA, coordinated with crew, fuel trucks, etc.

b6
b7C

[redacted] later called U.L at RNO and briefed them on all of the HJ's demands, procedures to be followed at RNO, etc.

252 Flight over EUR VOR, 10,000', 170KIAS, fuel aboard 33,500\$, FF and configuration remained the same. Advised that they had had no communications with the HJ for "about the last 55 minutes" despite several attempts on cockpit-to-cabin inter-phone and PA system. Crew was assured that fuel was more than adequate to get to RNO, that RNO weather was good, etc. SEADD had also been actively following, and participating in these events.

328 Over IFR, 10,000', TAT -5°, 170KIAS, fuel aboard 27,500\$, FF and configuration the same. Some airframe icing icing experienced. Engine anti-icing ON for appreciable length of time, wing AI on "Intermittently". Crew seemed slightly concerned about this, but were assured that it was no problem.

330* [redacted] asked that we suggest that flight crew slowly lower cabin temperature as much as practicable (to slow HJ's reflexes).

b6
b7C

335* NSVFO suggested a slow climb to 11,000' at Captain's discretion, to induce as much hypoxia in HJ as possible (Flight had previously been suggested to consider climb to as high as practicable--but that they would probably be performance limited to not much above 17,000'--but not above 18,500'. Upper limit to prevent a cabin oxygen mask drop from exciting HJ. 11,000' also needed for adequate terrain clearance RBL-RNO.

When flight was in RBL area, direct communications between NSPRO and the flight were interrupted. UAL 4331 and WLB 329 relayed messages [redacted] and from the flight for [redacted].

Flight now at 11,000', TAT -1°, all other factors essentially the same.

SE DME N RBL VOR, 11,000', fuel aboard 22,000#. Only evidence from cabin was aft entry door and air-stair warning lights still OK.

Flight switched to 900 AXING on 130.6. NSPRO put on "phone-patch" this frequency at same time.

Fuel aboard 17,300#. (14.75% fuel used)

Descent from 11,000 to 9,000' started.

Flight advised they were holding at 1100 OM until they had everything "in order".

Flight 1 mile out on final approach. (At this time, we--
NS PRO--were on telephone conference call. Other parties
apparently on the same line were RNO Tower, FAA SWA, FBI
Washington, FBI Seattle. Not known whether anyone else
might have also been tuned in.)

Tower "talked us through" his touchdown, subsequent taxiing. Door did not appear to go to full down position until relatively low speed on roll-out. Flaps appeared to be "UP". Parked at the (f) corner of terminal ramp.

Tower reported crew had exited airplane; with FBI at this time.

After parking, crew had advised on 550 AXING that one of them had gone back in cabin and found no sign of hij. They had apparently last tried to contact him via interphone/PA at about 0046CST with no response. At that time they were going to advise him that the air-stair would have to be retracted for landing or that damage during landing/roll-out would probably prevent subsequent take-off.

Two "little" chutes gone, one "big" one cut up, apparently to tie the money with shroud lines to hij. One "big" chute apparently still on the airplane.

Guard requested around airplane, FBI apparently searching airplane.

Was advised (all on conference call) at this time that hijacker was now under the jurisdiction of FBI in Washington.

point during the conference call, learned (it is not known from what a [redacted] operated a parachute jumping school at [redacted] and that he had previously been [redacted])

b6
b7C

NIAFO advised conference call participants that WA would hang up if they were no longer needed on that line. Was asked to standby by either PAA or FBI Washington. Did so.

PAA/FBI advised NIAFO that no further conference call info was required of WA at that time. Hung up. (Prior to our hanging up, [redacted] advised WA Washington on same line that he also was "signing off")

b6
b7C

about the flight from the time it was known that the hijacker's desired action was ILEK, preparations were made for a landing at YOM, and in, Mexico, as would have been necessary due to the limited range hijacker's specified configuration. Prior to the RNO landing NIAFO told that crew negotiate with hijacker to pull gear and flaps UP after take-off, that a non-stop flight to ILEK would then be possible. Of course, proved unnecessary.

Throughout the whole operation, excellent cooperation was received in concerned (except hijacker), including the Boeing Company, SIA, and IAC, ATC, SEA and RNO Towers, local FBI and Air Marshal personnel and all the experts that furnished help.

is no doubt left that the flight crew did a truly excellent job about.

FEDERAL BUREAU OF INVESTIGATION

Date November 26, 1971

[redacted], Northwest Orient Airlines,
 Portland International Airport, residence [redacted],
 Portland, telephone [redacted], furnished the following
 information concerning the events prior to the hijacking of
 Northwest Flight 305 from Portland, Oregon, to Seattle,
 Washington, on November 24, 1971:

b6
b7C

He was on duty [redacted] for Flight 305
 on November 24, 1971. He could not recognize any of the
 passengers by name, as he handles on a daily basis thousands
 of names. However, he remembers one particular individual who
 stood out in his mind. It was raining at the airport that date
 and all the passengers were making comments and jokingly stating
 they were going to have to run through a great deal of rain in
 order to board Flight 305 to Seattle. The only individual who
 was not mixing with other passengers and joking about the rain
 was a man whom he described as a white male, age 50, height
 6'1" plus, 175 to 180 lbs., slender build, with black wavy hair,
 smartly dressed, wearing a black raincoat and carrying a black
 attache case.

b6
b7C

[redacted] stated he has a habit of noticing individuals
 dressed in black and this was the reason he remembers the above-
 described individual. The man described above had a "blah"
 attitude and was quite unaffected by the inclement weather
 conditions prevailing at the time, which noticeably bothered
 the rest of the passengers.

b6
b7C

[redacted] is not sure whether he would recognize the
 individual described above if he were to see him again.

WAS CONTACTED AND ADVISED THAT A VOR RECEIVING DEVICE WOULD BE TOO BULKY TO BE CARRIED ABOARD THE FLIGHT UNSEEN, AND DUE TO THE TECHNICAL EFFORT OF THE DEVICE, IT WOULD PROBABLY REQUIRE A GOOD DEAL OF TRAINING IN ORDER TO OPERATE IT. HE ADVISED THAT THE SMALLEST MODEL OF THE VOR RECEIVING DEVICE IS TWO POINT SIX INCHES BY THREE POINT TWO INCHES BY TEN POINT SEVEN IN LENGTH, ^{WEIGHING} TWO POINT SEVEN POUNDS. SUCH A RECEIVER WOULD REQUIRE A TWELVE VOLT BATTERY TO OPERATE PROPERLY, AND A HORIZONTAL - POLARIZED ANTENNA APPROXIMATELY THREE FEET IN LENGTH WHICH WOULD EITHER HAVE TO BE EXTENDED FROM THE AIRPLANE OR ATTACHED TO THE WINDOW IN A VERTICAL POSITION.

[REDACTED] ADVISED THAT THE MOST LIKELY DEVICE TO BE USED IN SUCH A MANNER, AND DUE TO THE FLIGHT OF THE AIRCRAFT, WOULD BE THE MARKER BECON RECEIVER, WHICH ACCORDING TO [REDACTED], COULD BE MADE BY ANY PERSON WITH THE SLIGHTEST KNOWLEDGE OF COMMUNICATION OR RADIO EQUIPMENT. SUCH A DEVICE COULD BE THE SIZE OF A PACKAGE OF CIGARETTES OR FOR A MORE EXACTING DEVICE, COULD BE ANY SIZE.

[REDACTED] ADVISED THAT THE BECON RECEIVER WOULD WORK ON A NINE VOLT TRANSISTOR BATTERY AND SERIES WITH A NORMAN FLASHLIGHT BATTERY. SUCH A DEVICE CAN BE PURCHASED FROM ANY OF THE AVIATION COMPANIES FOR APPROXIMATELY TWO HUNDRED SEVENTYFIVE DOLLARS, WHICH [REDACTED] ADVISED IS THE MINIMUM PRICE. ACCORDING TO [REDACTED], THE MARKER BECON RECEIVER WILL NOT INTERFERE WITH ANY OF THE AIRCRAFT INSTRUMENTS, NOR CAN IT BE DETECTED WHILE IN USE.

[REDACTED] ADVISED THE DISTRIBUTORS OF SUCH A DEVICE IS NARCO AVIONICS, WHICH HAS DISTRIBUTORS THROUGHOUT THE COUNTRY, INCLUDING FIVE IN OREGON AND FIVE IN WASHINGTON.

JUST AS THE NORTHWEST PLANE WAS LEAVING PORTLAND AIRPORT, THE HIJACKER INFORMED THE STEWARDESS THAT HE HAD A BOMB AND WANTED HER TO SIT WITH HIM. AFTER TAKING THE SEAT BESIDE THE HIJACKER, HE OPENED A BLACK ATTACHE CASE HE HAD IN HIS LAP AND SHOWED HER WHAT HE CLAIMED WAS A BOMB. SHE LATER DESCRIBED THE CONTENTS OF THE ATTACHE CASE AS A BUNDLE OF RED STICKS WHICH SHE BELIEVED WAS DYNAMITE. THE BUNDLE CONSISTED OF SIX OR EIGHT REDDISH COLORED STICKS, SIX OR EIGHT INCHES LONG, WITH NO WRITING ON THE OUTSIDE. THERE WAS SMALL WIRE LEADING FROM BUNDLE OF STICKS, AND THE HIJACKER HELD IT IN HIS HAND AS IF TO INDICATE HE COULD DETONATE THE BOMB BY TOUCHING THE WIRE TO A CONTACT. THERE WAS ALSO A CYLINDRICAL SHAPED BATTERY IN THE BRIEFCASE ABOUT EIGHT INCHES LONG.

AT SEATTLE, IN ANSWER TO HIS DEMANDS, THE HIJACKER WAS FURNISHED WITH FOUR PARACHUTES AND \$200,000 IN \$20 BILLS IN CANVAS BANK BAG. WHEN THE PLANE LANDED AT RENO, NEVADA, SUBJECT

HE SAID IT WAS ENTIRELY POSSIBLE THAT THE MAN DID NOT JUMP WHEN THIS PRESSURE BUMP TOOK PLACE. IT WAS ENTIRELY POSSIBLE THAT HE SAT ON THE END OF THE STAIRS TO CHECK OUT HIS REFERENCE POINTS BEFORE HE JUMPED. IF HE DID THIS FOR EVEN A SHORT TIME, HE COULD HAVE EASILY LANDED ACROSS THE RIVER IN OREGON. HE POINTED OUT THIS CONNECTION THAT THERE IS AN AURORA FIELD NEAR DONALD, OREGON.

Dear Sir:

I believe I may have valuable #~~00000000~~ information for you to relay to the FBI office your city about the parachuting skyjacker who left the N-O Airlines plane in your area.

Please honor my request to remain anonymous in this letter to you and the FBI, anything further from me would be needless as I have all hunches on the identity of the skyjacker to give you in this letter, and nothing more and do not wish any type of retaliation now or later.

More than one person is involved I am very certain. The actual skyjacker himself I think, was recently employed [redacted]

[redacted] but his facial and hair appearances were not the same as the drawing of the suspect appearing in the papers everywhere. The features are the SAME, and all other characteristics described in the press reports. Doubtless, the suspect recently shortened his hair and mustache was shaved away. The jawbone, nose, MOUTH, forehead and ears plus overall physical description fits to this person [redacted]
[redacted] there last spring.

He would be [redacted] normally and itinerant and formerly lived in Florida. He would in the past be engaged in [redacted]

He would also be [redacted].

AT EUGENE, OREGON

24, 1971, he was at the Red Carpet Laundrymat in the
Rivera Shopping Center located on River Road in Eugene,
Oregon, to [redacted] at
which time he observed an individual sitting in a 1971
or 1972 copper colored Dodge Charger. He stated he
walked up to the man and [redacted].
The man indicated he was washing some clothes as he had
not had an opportunity to do so the previous day and he
was headed to Reno, Nevada. [redacted] stated he thought
the man's presence near the laundrymat was unusual and
therefore, noted the license number on the vehicle as
FFE-698 on a piece of paper he had in his pocket. [redacted]
stated he did not associate this man in the hijacking
until he saw the November 28, 1971, issue of the "Oregonian"
and noted certain similarity between the person portrayed
in the artist's drawing and the man at the laundrymat.

On November 28, 1971, [redacted], Eugene Police
Department, Records, advised that an inquiry of Department
of Motor Vehicles, Salem, Oregon, disclosed that Oregon
license FFE-698 belongs on a 1971 Dodge, Vehicle Identifi-

Enclosed for each receiving office are two copies of an artist's conception of captioned unsub.

Shortly after 3:00 p.m. Pacific Standard Time (PST) 11/24/71, a lone white male traveling from Portland, Oregon, to Seattle, Washington, on captioned flight displayed the contents of his brief case to a stewardess indicating to her it was a bomb which would be exploded unless his demands were met. The hijacker indicated his willingness to exchange the safety of the 36 passengers and crew for \$200,000 in cash and four parachutes. He instructed that the plane circle the Seattle airport until his demands were met at which time the plane landed. Once the money and parachutes were loaded and the plane was being refueled, the hijacker allowed the passengers and two airline stewardesses to deplane leaving a flight crew of three males and one female and the hijacker aboard. The hijacker indicated a desire to fly to Mexico City and instructed the plane to take off flying at a low altitude and slow speed, maintaining a southerly direction. Upon demand the hijacker was instructed on lowering the rear passenger door while the aircraft was in flight. He was last seen in the aircraft by crew members at 8:05 p.m. PST, when he instructed
